

A3

Wi-Watch A3 User Manual

Precautions

1.1 Failure to comply with the following precautions may be dangerous or illegal. Please read below carefully before using A3

Drive safely at all times

- Do not use a hand-held phone while driving. Park your vehicle first.

Switch off A3 when refueling

- Do not use the A3 at a refueling point (service station) or near fuels or chemicals.

Switch off in an aircraft

- Wireless phones can cause interference. Using them in an aircraft is both illegal and dangerous.

Switch off A3 near all medical equipment

- Hospitals or health care facilities may be using equipment that could be sensitive to external radio frequency

Interference

- All wireless phones may be subject to interference, which could affect their performance.

Be aware of special regulations

- Meet any special regulations in force in any area and always switch off your phone whenever it is forbidden to use it, or when it may cause interference or danger.

Sensible use

- Use only in the normal position. Avoid unnecessary contact with the antenna when the phone is switched on.

Keep your A3 away from small children

- Keep the phone and all its parts, including accessories, out of the reach of small children.

Accessories and batteries

- Use only approved batteries and accessories, such as headsets and PC data cables.

Use of any unauthorized accessories could damage you or your phone and may be dangerous.

Qualified service

- Only qualified service personnel may repair your phone.
- Use A3 away from sources of heat and high voltage, such as kitchen appliances or other electrical appliances. Use at temperatures above 55 °

C or below 10 °C damage the phone.

- Pay attention to fire prevention. Your A3 must be turned off when in chemical plants, gas stations, fuel tanks and other flammable materials.
- Do not place A3 above car airbags. Could cause physical damage if it explodes in an accident.
- Disassemble mobile phone without the manufacturer's authorization is strictly prohibited.
- Keep A3 away from other electronic equipment such as televisions, radios or personal computers. Do not place your A3 near credit cards or a magnetic field, which is strictly prohibited.
- Do not expose to mechanical vibration or strong agitation. Do not touch the screen with a sharp object, it is strictly prohibited.
- Note that the use of plastic cases can damage the lining original mobile phone.
- Do not use flammable substances, such as benzene or corrosive chemicals, unsuitable cleaners, thinner or alcohol. Wipe the phone's casing with a dry cloth, rubbing gently.
- Do not expose your phone in the sun or spaces with a lot of smoke or dust.

- Be careful when using headphones and other accessories. Use only the supplied accessories; unauthorized use of accessories can cause damage.
- Never pull the cord to disconnect the phone. Always hold the plug head.

1.2 When using the battery, please be aware of the following precautions.

This A3 has a built-in battery . Do not disassemble. If the abuse or neglect of these precautions causes damage to persons or property , the seller will not be responsible .

Leave A3 in a cool and ventilated place to charge the battery .

Otherwise, excessive temperature during the charging process (heat , smoke , fire) can deform the battery , or even cause an explosion .

It is strictly forbidden to open the battery if not authorized. Otherwise, it will cause breakage and leakage of liquid crystal panels . If the liquid comes in contact with eyes, there is a high risk of blindness. Immediately flush eyes with water (do not rub your eyes) , and go immediately to the hospital.

Do not expose the battery to mechanical vibration or strong agitation.

Be especially careful not to short-circuit it, as this may damage it. A short circuit can be caused by placing the battery very near metal objects such as coins or metal elements of everyday objects.

Do not use damaged or depleted batteries.

Do not place the battery near excessively hot or cold.

Never dispose of batteries in a fire. This will cause an explosion and fumes.

Do not put the battery in water. Otherwise it will cause an internal short can cause, deformation, damage, smoke, and even explosions.

Please dispose of batteries in accordance with the rules (such as recycling) . Do not dispose of household waste container, are highly polluting.

Keep batteries out of reach of children and keep them in safe places to avoid danger.

This battery is fed by a charger. Please do not hold the charge for more than 24 hours.

Keep batteries out of reach of children a safe place to prevent danger.

1.3When using the charger, please adhere to the following precautions.

Before using for the first time a charger, read and consider carefully the instructions and the label.

Do not disassemble or modify the charger. It is strictly prohibited to use the cable from the power supply if it is damaged, as this may cause electric shock, fire and damage to the charger and people.

Do not touch the charger with wet hands. If the charger comes in contact with water or other liquids, cut off the supply of energy.

Do not expose the charger to mechanical vibration or strong agitation.

Do not expose the charger directly to sunlight.

Do not use the charger in a high humidity such as bathrooms. The device is not waterproof, so it is strictly forbidden to use it in the rain or in very humid environments.

Do not use near televisions, radios and other electrical appliances.

To remove the charger, do not pull the power cord, can damage wiring or tears.

Please put the charger in a safe place out of the reach of children.

1.4 Icons and Definition

	Alarm is on		New message
	battery		Missed call
	Network signal		Meeting mode
	WLAN		Flight mode
	Bluetooth is on		Mute mode
	Music is on		USB mode

Main Features

Main features as below:

2.1 phone

Inserting a micro SIM card, you can make a phone call.

2.2 Messaging

You can view the coming message, write a new message and delete the message. Message settings allows you to customize the message tones etc.

2.3 Contacts

You can add a new contact, revise the contact, delete and check the contacts, make a phone call or send message directly to the contact

2.4 Clock

You can set the time and date when clicking the ;

you can set the alarm after clicking . Timer is on after clicking the Timer icon:

2.5 Gallery

You can check all the audio and video saved in your phone in this file.

2.6 Music

In this menu, you can view all the audio files in this file and play the music in the music player interface.

2.7 Email

2.7.1 Add a new account

2.7.2 Write an Email

2.7.3 Delete the Email

2.8 Gmail

2.9 Facebook

Click the Facebook icon, you need to register a new account if you do not have one.

2.10 Twitter

Register a new account or log in with your existing account and password.

2.11 GPS Navigation

2.12 APPs

All the APPs are located under this menu, you can also download the APP from Play Store

2.13 Browser

2.14 Video Player

2.15 Pedometer

Pedometer allows you to record the steps, view the burnt calories, setup daily workout plan and track the results.

Tap Pedometer to open the Pedometer page and set your personal data.

2.16 Settings

Tap Settings to configure the watch phone parameters, set Location access, Security, time and date, language & input, configure profile-related information and personal data, add Google account.

2.17 Tools

In this menu, you can use Calculator, Calendar and Sound recorder.

2.18 File Manger

In this menu, you can check all the files in A3.

It has more than 2G of memory inside, can communicate data with PC

FCC Statement:

1. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference.

(2) This device must accept any interference received, including interference that may cause undesired operation.

2. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

Reorient or relocate the receiving antenna.

Increase the separation between the equipment and receiver.

Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

Consult the dealer or an experienced radio/TV technician for help.

SAR Information Statement

Your wireless Smart Watch is a radio transmitter and receiver. It is designed and manufactured not to exceed the emission limits for exposure to radiofrequency (RF) energy set by the Federal Communications Commission of the U.S. Government. These limits are part of comprehensive guidelines and establish permitted levels of RF energy for the general population. The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons, regardless of age and health. The exposure standard for wireless Smart Watch employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC is 1.6 W/kg. * Tests for SAR are conducted with the watch transmitting at its highest certified power level in all tested frequency bands. Although the SAR is determined at the highest certified power level, the actual SAR level of the watch while operating can be well below the maximum value. This is because the watch is designed to operate at multiple power levels so as to use only the power required to reach the network. In general, the closer you are to a wireless base station antenna, the lower the power output. Before a watch model is available for sale to the public, it must be tested and certified to the FCC that it does not exceed the limit established by the government adopted requirement for safe exposure. The tests are performed in positions and locations (e.g., at the ear and worn on the body) as required by the FCC for each model. The highest SAR value for this model watch when tested for use at the mouth is **0.609W/Kg** and when worn on the Wrist, as described in this user guide, is **1.19W/Kg**(Wrist-worn measurements differ among watch models, depending upon available accessories and FCC requirements). While there may be differences between the SAR levels of various watches and at various positions, they all meet the government requirement for safe exposure. The FCC has granted an Equipment Authorization for this model watch with all reported SAR levels evaluated as in compliance with the FCC RF exposure guidelines. SAR information on this model watch is on file with the FCC and can be found under the Display Grant section of <http://www.fcc.gov/oet/fccid> after searching on

- FCC ID: **2AC3S-WI-WATCH-A3** Additional information on Specific Absorption Rates (SAR) can be found on the Cellular Telecommunications Industry Association (CTIA) web-site at <http://www.wow-com.com>. * In the United States and Canada, the SAR limit for mobile watches used by the public is 1.6 watts/kg (W/kg) averaged over one gram of tissue. The standard incorporates a substantial margin of safety to give additional protection for the public and to account for any variations in measurements.
- To comply with RF exposure requirements, a minimum separation distance of 10mm must be maintained between the user's mouth, including the antenna.
- Device is restricted to worn on the wrist operations.
